Flash message after button press	CJH, PK
Mobile integration for table, navigation and footer	CJH, PK
Styling of table, text input, etc	CJH, PK
Instructor Search Grades by name	PK
Instructor Search Remarks by name	PK
Resolve Remark requests	CJH, PK

### **Unsuccessful Features**

- Being able to return to page entered after log in
  - Example:
    - User enters “<http://localhost:5000/labs>” but isn’t logged in
    - Redirects to log in
    - User logs in and returns to labs page
  - We could not get this to work even when we tried following online guides. We managed to get it to partially work but we were not satisfied so we removed the feature entirely. This feature also wasn’t too important so it wasn’t a big issue that it was left out
